EIGHT REALES AND PESOS OF THE NEW WORLD

The references used to catalog this section are: (1) Primarily Elizondo's Eight Reales and Pesos of the New World, the first number indicates the coin number, and the "T" number indicates type; (2) Yeoman's Catalog of Modern World Coins - these are the "Y" numbers used to cross-reference each Elizondo type; (3) When Yeoman is not applicable, we are referring to W.D. Craig's Coins of the World 1750 - 1850, which are the "C" numbers.

We are hereby offering an unusual selection of Guatemalan "Carrera Pesos". The high grade coins, usually EFine and above, are the remainder of a group which we have been featuring in the last six months. We have noted that collectors have misconceptions about the Carrera coins. These coins, 99 out of 100, do not show the fine details in the lettering or the relief which is found in the Seated Liberty series. (El Ty 20, 484) no matter how high the grade--even in UNC condition; nor can they be compared to United States coins. Carrera coins, in addition to their poor engraving, were also poorly struck, and in nearly all cases the bust of Carrera can be expected to have very little detail in the hair including the chin area. Also the reverse of the coin in many cases will not have full legend in the ribbons (on the shield) and the sun above the shield will frequently be somewhat weak. Once in a while, a nice struck piece, one in 1,000 might show up in choice UNC grade. Such a coin has been known to sell for $200.00 to $300.00. We have actually never owned one in such condition and perhaps they were made as presentation pieces. Considering the above, we feel we are very reasonable by asking a price in the neighborhood of $40.00 for one in average uncirculated condition. Even though these coins are not well-struck they show hardly any wear and traces of original luster. They are in fact part of a hoard which remained underground for over 100 years,and once they are gone you may not be afforded another opportunity to obtain another specimen at this reasonable price. Not many are left, so please order now.

*982-EMX132 T36 Royalist c/s, smaller size "LCM". This unusual coin was originally a Chihuahua issue ETy2 and struck over and therefore showing a double shield and double bust. See V.T. Berg, Royalist Provisional Issues where he mentions these pieces as being struck over earlier coinage. Quite rare and Fine for issue. 200.00

*983-INSURGENT ISSUE Supreme National Counsel, Tlalpujahua with Insurgent counterstamp as in ETy40. Most interesting piece. Usually this type coin exceeds $1500.00. We are considering its weak strike and taking into consideration our own reasonable cost and offer this RRR coin for . . 800.00

*984-REVOLUTIONARY ISSUE EMX190 Parral 1 Peso 1913, obvious overstrike "D" in the word "DEL" and smaller impression of "P" below the "P" of "PARRAL". XFine nice for issue, Revolutionary series becoming popular. . . . 245.00

*986-Proof Set of 3 Coins, 1904, 10,25&50 Cents. The set is one of six known and among the two nicest. This choice UNC set was in fact in the collection of the former mintmaster of the Philadelphia Mint. The last auction record of a similar set realized $3,450 in the 1975 ANA auction and many thought it sold cheap. Considering the popularity of Panamanian coinage and the rarity of this set, we feel we are offering it at a reasonable price when asking only (see inside front cover). . . . 4,500.00

The 1868 date which follows comes in two distinctive and numismatically interesting types of cornucopies. Variety I is a weak cornucopia similar to that of previous years. Variety II is a redesigned well outlined cornucopia with all lines clearly visible and the coins flowing from the cornucopia are in different positions and in higher relief. This variety seems to appear in about the same quantities.

If you want to start a collection of Latin American numismatics, but don't know where to start — let us help you in your selection: coins, medals, paper money, tokens, proofs, patterns, proclamations — WE HAVE THEM ALL.

GUATEMALA: Guatemalan coins have long been undermined, even in the most recent catalogs, including Krause, where many 19th Century specimens even in BU are evaluated at barely $3.00 to $5.00. The interest in Guatemalan coins in their country of origin in recent years has increased their value in leaps and bounds, and many are exceeding in price several times the evaluations indicated in most catalogs. We predict that the interest will continue to accelerate, as popularity continues to increase, and we advise the collector to buy them while they are still perhaps the biggest Latin American numismatic bargain.

NEW BOOK ON CENTRAL AMERICAN COINAGE
— NOW AVAILABLE —

CATALOGO DE MONEDAS Y MEDALLAS DE PROCLAMA DE CENTRO AMERICA Y PANAMA by Felipe Siliezar-Ramos. While the book is basically a Spanish work, the preface and historical notes on Central American numismatics have been translated into English. Prices are given in up to three grades of conservation in Quetzales, the national coinage of Guatemala. Since the Quetzal is legally and actually at par with the U.S. Dollar, this makes it extremely easy for the American collector to use. All types are illustrated. The book is divided into four parts which are further divided into logical subsections by country, chronology, political affiliations, and denominations. Over 400 pages. Retail price in U.S. $14.50.

MEXICO

THE COMPREHENSIVE CATALOG AND ENCYCLOPEDIA OF REPUBLIC MEXICAN COINS by W. Larry Hanks, 1977 edition was used to catalog the following Mexican coins. Thus the number in parenthesis to the left of coin description corresponds to the number used in his book.

THE COMPREHENSIVE CATALOG AND ENCYCLOPEDIA OF REPUBLIC MEXICAN COINS by W. Larry Hanks. This is the second book of a series of three, dealing with the coinage of Mexico. This particular book covers the Republican Era (1822-1905). An expanded grading and counterfeit section, and of special interest a section on overdates are included along with many new charts and tables. Updated prices are in five grades. A truly commendable book. 10.00

To complement Hanks' book, is another fine book we feel we must mention, *THE AVAILABILITY OF 20TH CENTURY MEXICAN COINS, 2ND EDITION*, by Richard A. Long. This new edition features articles on the availabity of coins, a common-sense guide to grading coins, charts of coin values (in BU condition) from 1960 to date, and bullion values of silver and gold coins. It also prices each coin in seven grades. Another fine reference work. 12.50
